

No. FD/BCC/ 657-756 /2026

**AZAD GOVERNMENT OF THE STATE OF JAMMU & KASHMIR  
FINANCE DEPARTMENT**

**Dated: 16<sup>th</sup> January, 2026**

To:

1. The Additional Chief Secretary (Gen./Dev.), Azad Govt. of the State of Jammu & Kashmir.
2. The Senior Member Board of Revenue, Azad Govt. of the State of Jammu & Kashmir.
3. The Secretary to the Prime Minister, Azad Govt. of the State of Jammu & Kashmir.
4. All Secretaries (PAOs) to the Government, Azad Govt. of the State of Jammu & Kashmir.
5. The Secretary, Azad Jammu & Kashmir Legislative Assembly Muzaffarabad.

**SUBJECT: BUDGET CALL CIRCULAR FOR BUDGET ESTIMATES 2026-27 & REVISED ESTIMATES 2025-26.**

Sir,

I am directed to refer to the subject cited above and to forward the documents / forms with this Budget Call Circular (BCC) for preparation and submission of the Budget Estimates 2026-27 & Revised Estimates 2025-26. The Estimates may be prepared as per the timelines mentioned in the attached Budget Calendar (**Annex-I**).

2. While formulating the Budget Estimates for the Financial Year 2026-27, it may kindly be recognized that budget is not only an expression of numbers. Essentially, it is a policy document of the Government setting its strategic priorities; preparing action plans; devising ways & means to achieve those objectives through corresponding resource allocation. Accordingly, it is imperative for all stakeholders to undertake necessary and due diligence while articulating the demands for resource allocation besides ensuring austerity in public spending. As the Government aims to ensure allocative efficiency; bridge the continuously widening gap between projected expenditures and realizable receipts, this can only be achieved through resource mobilization and establishing necessary linkages of the demanded resources with expected outcomes and effective service delivery.

3. Moreover, reliability, accuracy and completeness of the detailed object wise information provided in the enclosed forms will enable the Finance Department to make informed choices as to how best the scarce public resources are allocated for achieving the policy objectives for a particular year and to avoid unnecessary initiation of demands for provision of supplementary grants. Finance Department has also taken an initiative for discussions with Administrative Departments on Budget Estimates and separate meetings will

be planned to discuss and firm up the Budget Estimates for FY 2026-27 in accordance with the Government policy.

4. Administrative Departments are requested to send the **Revised Estimates for FY 2025-26 and Budget Estimates for 2026-27, "DDO wise"**, to the Finance Department in the New Accounting Module (NAM) mode as prescribed. While filling in the forms, following points may be kept in view:

- a. The forms shall be filled in by the DDO/Collecting Officer, both in the case of Budget Estimates for Current/Development Expenditure and Receipts Estimates as per the instructions on the subject. Departments should submit their budget estimates with detailed objects by carrying out an extensive exercise to assess the realistic needs for the next Financial Year to avoid supplementary or additional grants at the very outset of Financial Year 2026-27;
- b. Need for current budget for the Project(s) which are likely to be completed during current financial year must be finalized by **February 10, 2026** and a comprehensive proposal on a summary may be sent to Finance Department along-with PC-III;
- c. In order to avoid distortions in the budget estimates for the next year, the actual expenditure for the current financial year must be indicated clearly along with the estimates for the next year;
- d. Estimates for utilities and other periodical expenditures must be accompanied by statements indicating designation of officers, entitlement of vehicle/telephone, and ceilings for ensuring accurate budgetary allocations;
- e. While formulating budget estimates, Administrative Departments may determine the performance targets for their field offices/attached departments;
- f. The schedule given in the Budget Calendar (**Annex-I**) must be strictly adhered to;
- g. The Austerity measures/instructions issued by Finance Department must be implemented in its letter and spirit;

5. Finance Department will make necessary budgetary allocations depending upon the resource availability and in line with the policy framework of the Government. Finance Department may reduce or delete an appropriation if the departments do not meet the prescribed criteria/requirements. The time-schedule for the submission of Revised Estimates **2025-26** and Budget Estimates **2026-27** is placed at **Annex-I**. Administrative Departments are requested to consolidate the estimates received from various units under their control on NAM

format and submit the consolidated estimates, duly verified, to this office in the form of hard as well as soft copies. Email address for submission of soft copy is; [ajkbudget@gmail.com](mailto:ajkbudget@gmail.com).

6. I would personally request the Principal Accounting Officers/Secretaries of the Department to support this reform initiative and do not hesitate to contact the Finance Department for any further clarification and assistance.

7. Earlier circular bearing no. FDB/BCC/16074-16174/2025 dated 16<sup>th</sup> December 2025 on the cited subject is hereby withdrawal revoked ab-initio.

Yours Sincerely,

  
(Arif Iqbal Usmani)  
Deputy Secretary  
(Budget)  
Ph # 05822-921967

## **INSTRUCTIONS FOR FORMAT OF BUDGETARY ESTIMATES OF RECEIPTS**

### **IMPORTANT:**

The departments should read the following instructions carefully and all estimates should invariably be prepared in the enclosed forms.

### **GENERAL INSTRUCTIONS:**

- 1) Departments/Attached Departments are required to submit details of their budgetary estimates of receipts;
- 2) No column should be left blank. In case any column is not applicable it should state **Not-Applicable**.
- 3) Enter the most appropriate Climate Budget Tagging (CBT) Codes from the Climate Budget Actions and Measures List (Table 1, Annexure XI) that corresponds to the specific revenue sources. You may select more than one code if multiple measures apply to the proposed receipts. Assign a percentage to each relevant action and measure based on the extent to which the receipt aligns with the corresponding action and measure . *Although Table 1 provides a list of actions and measures specific to Sectors, complete list of actions and measures may be reviewed to identify additional actions and measures relevant to proposed activities.*
- 4) Enter the most appropriate Gender Budget Tag (GDT) Code from the Gender Budget Actions and Measures list (Table 2 ,Annexure II) that corresponds to gender relevant activities proposed for the next financial

*year. (e.g. gender awareness promotion, gender justice, actions). Assign a percentage to the relevant GDT Action & Measure based on the extent to which the receipt aligns with the corresponding Action & Measure*

5)

**SPECIFIC INSTRUCTIONS:**

- |                                     |                                                                                                                                                                                                                                                                                               |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| a) Object Code.                     | Space has been provided for this purpose. You may consult the Chart of Accounts (CoA) and fill all the major, minor and detailed codes carefully for receipts. CoA is available on the Website of Finance Department i.e.<br><a href="http://www.financeajk.gok.pk">www.financeajk.gok.pk</a> |
| b) Description                      | Description of the object classification at the detailed level.                                                                                                                                                                                                                               |
| c) Budget Estimates/Actual Accounts | Enter the information as required                                                                                                                                                                                                                                                             |

## **INSTRUCTIONS FOR PREPARATION OF REGULAR BUDGET ESTIMATES**

### **IMPORTANT:**

THE DRAWING AND DISBURSING OFFICERS / DEPARTMENTS SHOULD READ THE FOLLOWING INSTRUCTIONS CAREFULLY TO FILL THEIR REGULAR BUDGET ESTIMATES IN THE ENCLOSED FORMS

### **GENERAL INSTRUCTIONS:**

1. DDOs are required to submit the following estimates separately for each office:
  - a. Regular Budget Estimates
  - b. Revised Estimate
2. No Column should be left blank. In case any column is not applicable it should be filled out as **"Not Applicable"**.
3. Shaded portions are NOT required to be filled by the DDOs.
4. **For tagging the cost centre's budget in accordance with the Climate Budget Tagging Codes, following instructions should be followed**
  - i. All departments must review their regular (recurrent) expenditures to identify allocations that support climate mitigation, adaptation, or supporting areas.
  - ii. For instance, electricity generated from solar panels, the use of hybrid vehicles, or maintenance of wastewater treatment plants should be tagged under the corresponding CBT Code from the Climate Budget Actions and Measures list given in Table 1 Actions and Measures List in annexure I.
  - iii. Each cost centre should mention the relevant CBT Codes, the climate relevance (mitigation, adaptation, or support area), and assess what percentage of the total budget is dedicated to each of the CBT codes selected.
  - iv. If any or some Actions and Measures are supported from your centre's budget, then identify the Actions and Measures from Annexure I below that are being supported in your budget, then record the relevant CBT code. Although Table 1 provides a list of actions and measures specific to Sectors, complete list of actions and measures may be reviewed to identify additional actions and measures relevant to proposed activities. You can choose up to three CBT codes in 3a, 3b and 3c from the list provided in Table 1
5. Gender budgeting is a regular feature of the BCC. Departments are required to fill the relevant form specifying gender-wise budget estimates and expenditure during each financial year. Following steps may be followed for gender budget tagging of your expenditures
  - a. Review departmental programs, projects, or budget lines to

identify any activity that has a direct or indirect gender impact (e.g., women's education, maternal health, gender-based violence prevention, economic empowerment initiatives, or women's participation in governance).

- b. Refer to annexure II, Table 2 : Gender-Related Actions and Measures in the GDT Guidelines and Identify the **most appropriate GDT code** that aligns with your activity or expenditure .
- c. Each GDT code corresponds to a specific gender-responsive action or measure.
- d. Enter the **selected GDT code** in the "Gender Budget Tagging Code"
- e. Assign a **quantitative weightage (0–100%)** based on the proportion of the budget item that contributes to gender objectives.
  - *Example:* If 50% of a project's activities target women's empowerment, record 50% as the weightage.
- f. Provide a brief justification in the remarks or explanatory memo section explaining how the activity contributes to gender outcomes
- g. Include any gender-disaggregated data, where available.

### **SPECIFIC INSTRUCTIONS:**

|              |                                                                                                                                            |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Serial No. 1 | Preprinted Budget / Financial year                                                                                                         |
| Serial No. 2 | Tick the relevant document – Regular Budget Estimates, Revised Estimates                                                                   |
| Serial No. 3 | Enter the 7 digit <b>Fund Code</b> e.g. KC21014- Education and its description (Demand/Grant)                                              |

| Serial No. 5 | Enter the 6 digit <b>Fund Center / DDO Code</b> and its <b>Description</b> i.e. its nomenclature.                                          |
| Serial No. 6 | <b>For tagging the cost centre's budget in accordance with the Climate Budget Tagging Codes, following instructions should be followed</b> |

|              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|              | <ul style="list-style-type: none"> <li>i. All departments must review their regular (recurrent) expenditures to identify allocations that support climate mitigation, adaptation, or supporting areas.</li> <li>ii. For instance, electricity generated from solar panels, the use of hybrid vehicles, or maintenance of wastewater treatment plants should be tagged under the corresponding CBT Code from the Climate Budget Actions and Measures list given in Table 1 Actions and Measures List in annexure I.</li> <li>iii. Each cost centre should mention the relevant CBT Codes, the climate relevance (mitigation, adaptation, or support area), and assess what percentage of the total budget is dedicated to each of the CBT codes selected.</li> <li>iv. If any or some Actions and Measures are supported from your centre's budget, then identify the Actions and Measures from Annexure I below that are being supported in your budget, then record the relevant CBT code. Although Table 1 provides a list of actions and measures specific to Sectors, complete list of actions and measures may be reviewed to identify additional actions and measures relevant to proposed activities. You can choose up to three CBT codes from the list provided in Table 1</li> </ul>                                                                                                                             |
| Serial No. 7 | <p>Gender budgeting is a regular feature of the BCC. Departments are required to fill the relevant form specifying gender-wise budget estimates and expenditure during each financial year. Following steps may be followed for gender budget tagging of your expenditures</p> <ul style="list-style-type: none"> <li>i. Review departmental programs, projects, or budget lines to identify any activity that has a direct or indirect gender impact (e.g., women's education, maternal health, gender-based violence prevention, economic empowerment initiatives, or women's participation in governance).</li> <li>ii. Refer to annexure II , Table 2 : Gender-Related Actions and Measures in the GDT Guidelines and Identify the <b>most appropriate GDT code</b> that aligns with your activity or expenditure .</li> <li>iii. Each GDT code corresponds to a specific gender-responsive action or measure.</li> <li>iv. Enter the <b>selected GDT code</b> in the "Gender Budget Tagging Code"</li> <li>v. Assign a <b>quantitative weightage (0–100%)</b> based on the proportion of the budget item that contributes to gender objectives. <i>Example:</i> If 50% of a project's activities target women's empowerment, record 50% as the weightage.</li> <li>vi. Provide a brief justification in the remarks or explanatory memo section explaining how the activity contributes to gender outcomes</li> </ul> |

|                                                     |  |  |  |  |  |  |  |  |  |  |  |
| TOTAL ( C )                                         |  |  |  |  |  |  |  |  |  |  |  |
| Grand Total (A+B+C)                                 |  |  |  |  |  |  |  |  |  |  |  |

Note: Head wise estimates expenditure be prepared as per Annex-IV and also provide recurring cost of schemes to be completed on 30<sup>th</sup> June 2026.

It includes the total allocations against the schemes at A, B & C and funds will be provided to the schemes at Sr. No. B&C as and when additional resources are made available by the Finance Department. This refers to the additional current expenditure on account of the portion of the scheme completed.

This refers to the additional current expenditure on account of portion of the scheme completed.

#### Instructions for Climate and Gender related columns (4-7):

- Each development scheme proposed under the ADP must be screened for its relevance to climate and gender objectives. Departments should consult the Actions and Measures list to identify the appropriate CBT Codes. Each project should specify whether it contributes to mitigation or adaptation, record the CBT Code, and estimate the climate-related share of the total cost (e.g. a solar irrigation project should be assigned the CBT Code "CBT 003 – Adoption of Solar Energy and Other Renewables" and classified as High as described in the para # 7 of the annexure XI:

- Please refer to the (Table 1, Annex XI): Climate Budget Actions & Measures below and review the (Table 1, Annex XI): Actions & Measures listed.
- If no Action and Measure is relevant to your project, then record that specific project does not have climate linked budget and skip the following step (c) and (d).
- If any or some Actions and Measures are supported in a project, then identify the CBT Actions and Measures that are being supported by that project, then record the relevant CBT codes (multiple entries allowed in one field) in column 4.
- For each CBT code supported in the project, please assess the percentage of the project supporting that Action and Measure in column 5.

DDO SIGNATURE WITH STAMP

- ii. (e) Perform step (c) & (d) for up to for all the projects listed in the form. To tag a scheme as gender-budget-relevant scheme, review Table 2 – List of Actions and Measures – in Annexure XII. If any action or measure applies to the scheme, record the corresponding code in column 5.

Assign an appropriate weight in column 6 to the scheme depending on the objective of the scheme if the scheme is to support any gender related objectives.

# **Annexure XI: Climate Budget Tagging (CBT) Guidelines 2026–27**

## **1. Purpose**

The Climate Budget Tagging (CBT) Guidelines aim to provide a structured approach for identifying, classifying, and reporting government revenues & expenditures that contribute to environmental protection, climate change mitigation, and adaptation. This initiative is part of the Government of AJ&K's efforts to integrate climate considerations into fiscal planning and public financial management. Through the Climate Budget Tagging process, all departments will be able to align their allocations and activities with AJ&K's environmental goals and Sustainable Development Goal (SDG) 13 on Climate Action.

## **2. Scope and Applicability**

These guidelines apply to all Administrative Departments, Attached Entities, Cost Centers (DDOs) and Autonomous Bodies of the Government of Azad Jammu and Kashmir. The Climate Budget Tagging will cover both Development and Non-Development expenditures. Each department is required to review its budget estimates and identify those components that directly or indirectly contribute to environmental sustainability, climate adaptation, or mitigation. All such expenditures will be tagged and reported according to the methodology provided in these guidelines.

## **3. Objectives of Climate Budget Tagging**

The Climate Budget Tagging framework is designed to integrate environmental and climate priorities into AJ&K's budgeting process. It enables departments to identify and track climate-relevant revenues & spending, thereby improving transparency, accountability, and informed decision-making. It also helps the Government of Azad Jammu and Kashmir access domestic and international climate finance and report progress on national, provincial and regional governments' commitments under the SDGs and climate change policies.

## **4. Methodological Principles**

The Government of Azad Jammu and Kashmir is instituting Climate Budget Tagging to generate data and information for planning and implementing adaptation and mitigation measures to address the adverse effects of climate change in the resources and people of Azad

Jammu and Kashmir. The Climate Budget Tagging will be implemented to generate and institutionalize:

- (a) Granular data for detailed assessments of expenditures and their effects
- (b) Dimensional variegation of data to allow for all relevant aspects to be recorded
- (c) Comparator comparability to allow for comparative analysis across areas
- (d) Intertemporal comparability to ensure analysis over time and tracking trends
- (e) Analytical Usability for increasing the efficiency and effectiveness of public resources
- (f) Planning Usability to gain maximum results from development and new expenditures
- (g) Dynamic scheme to allow for additional analysis as new scientific knowledge becomes available

Budget forms have been augmented with notes to allow budget tagging, aggregation of data, reporting, and analysis. A reference table, namely Climate Budget Tagging Actions and Measures, has been prepared bringing together international standards and scientific precepts with the Government of AJ&K's budget structures. It has been prepared so that each departmental unit can readily refer to only their relevant section while following the function, minor function and detailed function.

#### **4. Policy Reference Framework**

The implementation of Climate Budget Tagging will be guided by several policy documents and legal frameworks, including the National Climate Change Policy (2012, updated 2021), It also aligns with the Sustainable Development Goals (particularly SDG 13 – Climate Action), as well as commitments to Gender Equality (SDG 5) and Human Rights. These references ensure that climate responsiveness is embedded in all relevant policy, planning, and financial decisions.

#### **6. Institutional Roles and Responsibilities**

The successful implementation of Climate Budget Tagging requires coordination among several institutions. The Finance Department, through its Budget Wing, will lead the process by issuing the Climate Budget Tagging Guidelines, integrating tagging mechanisms into the Integrated Financial Management Information System (IFMIS), and compiling the annual AJ&K Climate Budget Statement.

The Environment Protection Agency of the Government of AJ&K will serve as the technical focal point, providing guidance, defining climate taxonomy, and reviewing departmental submissions for accuracy. The Planning & Development Department (P&DD) will ensure that development projects (PC-I and PC-II) are screened for climate relevance and aligned with SDG indicators.

Each Line Department will be responsible for tagging its own projects and recurrent expenditures in accordance with these guidelines, using the prescribed Forms at annex III, V, VII and X. All Cost Centers (DDOs) must maintain detailed records of climate-linked revenues & expenditures for future verification and audits.

## 7. Categorization of Climate Expenditures

From the Climate Tagged data, under the Climate Budget system, all government spending will be aggregated according to the degree of its relevance to environmental and climate objectives. The classification will help measure and monitor the scale of climate-related investment within GoAJ&K's public sector.

| Category                        | Description                                                                                                      | Examples                                                                        |
|---------------------------------|------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| Primary / High Relevance (≥75%) | Expenditures that directly contribute to environmental protection, climate change mitigation, or adaptation.     | Renewable energy projects, afforestation, flood protection, forest restoration. |
| Medium Relevant (50–74%)        | Expenditures that generate significant environmental or climate co-benefits.                                     | Irrigation efficiency, hybrid or electric transport, clean energy initiatives.  |
| Low Relevance (25–49%)          | Expenditures that indirectly support environmental objectives through research, awareness, or capacity building. | Training, data collection, monitoring systems.                                  |
| Marginal (1–24%)                | Expenditures with limited environmental relevance but minor indirect benefits.                                   | Routine maintenance, basic administrative activities.                           |
| Neutral / No-Relevance (0%)     | Expenditures with no direct link to environmental or climate outcomes.                                           | Salaries, general administration, road resurfacing.                             |

## 8. Tagging Methodology

Each department shall use the Forms at annexure III, V, VII and X annexed to the Budget Call Circular to identify and record climate-related revenues & expenditures. Departments must first review their activities both on going and proposed activities to determine which activities or budget lines have climate relevance.

For each project or expenditure item, departments should assess whether it supports climate mitigation, adaptation, or environmental protection. **Climate mitigation** refers to any action taken by governments, business or people to reduce or prevent green houses gases or to enhance carbon sinks that remove them from the atmosphere<sup>1</sup>. Whereas **climate adaptation** refers to all those actions that help reduce vulnerability to the current or expected impacts of the climate change. Climate Supporting Areas are expenditures that indirectly support climate action through policy, institutional, or enabling measures such as capacity building, research, or governance reforms. Whereas climate neutral are those actions which have no impact on climate change.

The share of the total budget that contributes to these objectives should then be estimated in percentage terms. The departments will refer to Climate Budget Actions & Measures Table-1 provided below, select the applicable actions and measures for the cost center and determine the Actions and Measures (CBT) code and assess what percentage of the budget can be dedicated to them. Based on this assessment, in the consolidation phase, each item will be assigned an aggregate category – Primary, Medium, Low, Marginal, or Neutral.

All tagging information must be accurately entered into Forms at annexure III, V, VII & X and submitted to the Finance Department along with the departmental Budget Estimates for FY 2026–27. The Finance Department will review and verify the data before consolidating it into the overall Climate Budget Statement. During this budget cycle and preparation, technical support will be provided to the departments and pre-filled climate budget tagging forms will be provided for review at the level of DDOs and PAOs.

## 10. Sectoral Reference Examples

The following examples are provided to guide departments in classifying expenditures:

| Sector | Mitigation Examples                                      | Adaptation Examples                                    |
|--------|----------------------------------------------------------|--------------------------------------------------------|
| Energy | Solar and wind projects, energy-efficient infrastructure | Off-grid solar for water supply in drought-prone areas |

<sup>11</sup> <https://climatepromise.undp.org/news-and-stories/what-climate-change-mitigation-and-why-it-urgent>

|                           |                                                       |                                                                      |
|---------------------------|-------------------------------------------------------|----------------------------------------------------------------------|
| Water Resources           | Efficient irrigation systems, wastewater recycling    | Rainwater harvesting, water storage infrastructure                   |
| Agriculture               | Climate-smart farming and sustainable land management | Drought-resistant seeds, improved water management                   |
| Forestry and Biodiversity | Carbon sequestration, tree planting                   | Mangrove restoration, biodiversity conservation                      |
| Transport                 | Public transport systems, electric vehicle promotion  | Climate-resilient road construction                                  |
| Health                    | Energy-efficient hospitals and clinics                | Heatwave management, disease surveillance for vector-borne illnesses |

## 11. Reporting and Monitoring

Each department must submit completed forms at annexure III, V, VII, & X with climate-tagged entries and relevant CBT Codes. The Finance Department will compile a comprehensive Climate Budget Statement each year, which will be published alongside the Annual Budget. The statement will summarize all climate-tagged revenues & expenditures by department and sector and present trends in climate-related revenues & spending.

## 12. Capacity Building and Support

To ensure effective implementation, the Finance Department in collaboration with the Planning & Development Department, will conduct training sessions and orientation workshops for departmental budget and planning officers. These training sessions will emphasize the identification of climate-relevant activities, the proper selection of CBT Codes from the Table Actions and Measures List, and the correct use of Forms at annexure III, V, VII and X. The trainers will also guide participants on the application of tagging classifications. Ongoing technical support will be provided to ensure consistency and enhance the quality of data generated through the tagging process

## 13. Expected Outputs

The application of these guidelines will produce three main outputs: (i) the Budget Forms III, V, VII and X for departmental tagging, (ii) departmental Climate Budget Summaries showing climate-related allocations, and (iii) the consolidated Government of AJ&K's Climate Budget Statement, which

will serve as an official record of climate-responsive public revenues & expenditure in Azad Jammu and Kashmir.

#### 14. Effective Date

These Climate Budget Tagging Guidelines shall come into effect immediately and will be applicable to the Budget Estimates for FY 2026–27 and all future budget cycles. All departments must ensure that climate-relevant revenues and expenditures are accurately identified, tagged, and coded using the prescribed CBT Codes. Departments are further instructed to fully comply with these procedures and integrate climate considerations appropriately within their budget proposals.

**Table 1: Climate Budget Actions & Measures**

| Climate Budget Tag Code | Actions and Measures                                                                                                                                                                                                                                                                 |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         | <b>Agriculture</b>                                                                                                                                                                                                                                                                   |
| CBT AG 001              | Sustainable climate-resilient farming methods; promote the transition to climate-smart and regenerative agricultural practices that support ecosystem restoration and integrated management of productive landscapes for food security, low-carbon and climate-resilient production. |
| CBT AG 002              | Increase and maintenance of the CO <sub>2</sub> -binding capacity of soil and vegetation                                                                                                                                                                                             |
| CBT AG 003              | Promoting diversified agricultural production to reduce climate risk (e.g. growing a mix of different crops and different varieties of each crop)                                                                                                                                    |
| CBT AG 004              | Using crop residues for energy generation                                                                                                                                                                                                                                            |
| CBT AG 005              | Promoting heat and drought resistant crops and water saving irrigation methods to withstand climate change                                                                                                                                                                           |
| CBT AG 006              | Use of energy saving machineries, design of eco-efficient, carbon neutral systems etc.                                                                                                                                                                                               |
| CBT AG 007              | Cultivate and distribute climate-resilient seeds                                                                                                                                                                                                                                     |
| CBT AG 008              | Actions to prevent desertification                                                                                                                                                                                                                                                   |
| CBT AG 009              | Soil conservation; implement conservation and rational use and recovery of soils, including measures to prevent degradation and improve soil health.                                                                                                                                 |
| CBT AG 010              | Support fertilizer management and efficient irrigation systems, including biofertilizer production, efficient irrigation (e.g. responsive drip, fertigation) and equipment for timely, efficient fertilizer application.                                                             |
| CBT AG 011              | Farmer education and farmer support resources                                                                                                                                                                                                                                        |

|            |                                                                                                                                                                                                                                    |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CBT AG 012 | Set up/use of early warning communications system for agricultural purposes (e.g. communications/IT solutions for monitoring crops, precipitation, temperature etc. to avoid crop loss through climate-related stress or disaster) |
| CBT AG 013 | Invest in restoration and ecological regeneration of degraded and degrading lands and agro-landscapes.                                                                                                                             |
| CBT AG 014 | Support crop rotation through seeds, seedlings, equipment, labour and technical assistance to facilitate rotation in transitional or short-cycle crops.                                                                            |
| CBT AG 015 | Support conservation of forests, biodiversity and other natural ecosystems linked to agricultural landscapes.                                                                                                                      |
|            | <b>Autonomous Municipal Bodies</b>                                                                                                                                                                                                 |
| CBT AM 001 | Grants to anonymous bodies used in climate mitigation actions (Solar/water etc.)                                                                                                                                                   |
|            | <b>Banking &amp; Financial Services</b>                                                                                                                                                                                            |
| CBT BF 001 | Dedicated credit lines to finance renewable energy, the support of low-carbon investments, investments                                                                                                                             |
| CBT BF 002 | Promotion of Micro, Small and Medium Enterprises'                                                                                                                                                                                  |
| CBT BF 003 | Financing mechanisms for adoption of climate action solutions                                                                                                                                                                      |
| CBT BF 004 | Financing mechanisms for adoption of solar energy solutions                                                                                                                                                                        |
| CBT BS 001 | Tools to strengthen the capacity of the private sector for climate change                                                                                                                                                          |
| CBT BS 002 | Linking initiatives, stakeholders and knowledge for climate resilient livelihood security including vulnerability to climate change                                                                                                |
| CBT BS 003 | Finance measures in the field of climate protection for preparing and supporting private investment on a public-private partnership basis (PPP)                                                                                    |
|            | <b>Construction</b>                                                                                                                                                                                                                |
| CBT CN 001 | More robust building regulations and improved enforcement practices when there is a shift in zones affected by climate disasters                                                                                                   |
| CBT CN 002 | Promotion of energy-efficient building techniques, development and enforcement of related standards and certification schemes                                                                                                      |
| CBT CN 003 | Floods prone area building zoning and regulation especially in the mountainous areas                                                                                                                                               |
| CBT CN 004 | Programme of activities (PoA) in energy efficiency in the construction sector                                                                                                                                                      |
| CBT CN 005 | Building adaptive and resilient housing                                                                                                                                                                                            |
| CBT CN 006 | Actions to reduce heat exposures through design mitigation                                                                                                                                                                         |
| CBT CN 007 | Actions to stabilize roads against climate induced events                                                                                                                                                                          |
| CBT CN 008 | Promote renovation of existing buildings that improves energy performance and supports low-carbon operation in line with the taxonomy's thresholds                                                                                 |
| CBT CN 009 | Implement sustainable urban drainage systems in cities that demonstrate retention of runoff water, reducing flood risk and improving water management                                                                              |
| CBT CN 010 | Support wastewater treatment plants (grey and black) to avoid disposal of wastewater into municipal treatment systems and enable safe reuse or discharge                                                                           |

|                                                        |                                                                                                                                                                                                                                                                                               |
|--------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CBT CN 011                                             | Invest in trees in road easements that provide shade and are easy to maintain, contributing to cooler and more resilient urban landscapes                                                                                                                                                     |
| CBT CN 012                                             | Support recovery of public spaces along urban rivers after sanitation, reclaiming cleaned riverbanks for safe community use                                                                                                                                                                   |
| CBT CN 013                                             | Invest in design, construction, extension, rehabilitation and operation of flood-risk prevention and protection infrastructure, including dikes, river embankments, sea defence dikes, storm-surge barriers, seawalls, groynes, breakwaters and buffer basins for flood detention and control |

| CBT EE 012                      | Fuel switching from one fuel to a different, less GHG-intensive fuel type qualifies as mitigation if a net emission reduction can be demonstrated taking extensions of capacity and lifetime of the facility into account. |
| CBT EE 013                      | Energy efficiency solution and minimizing losses                                                                                                                                                                           |
| CBT EE 014                      | Combined heat and power plants: heat generation can also be associated with energy efficiency if combined with power generation.                                                                                           |
| CBT EE 015                      | Clean cooking solutions that are less dependent on traditional biomass are both relevant for mitigation and adaptation (making cooking food less dependent on climate vulnerable biomass resources)                        |
| CBT EE 016                      | Efficiency in new construction (exceeding available standards) and retrofitting of existing buildings, e.g., improving the efficiency of air conditioning of hospitals in hot regions                                      |
| CBT EE 017                      | Wind energy, photovoltaic and concentrated solar power (CSP), geothermal, biomass and biogas, ocean tide power score for mitigation                                                                                        |
| CBT EE 018                      | Hydropower (storage or run-of-the-river) only if net emission reductions can be demonstrated                                                                                                                               |
| CBT EE 019                      | Support to institutional framework in biofuels                                                                                                                                                                             |
| CBT EE 020                      | Training in renewable energy                                                                                                                                                                                               |
| CBT EE 021                      | Activities in which existing power plants switch to lower emitting fuels (e.g., switching from coal to natural gas)                                                                                                        |
| CBT EE 022                      | Integration of renewable sources into local or national grid, or energy efficiency measures in grid retrofitting:                                                                                                          |
| CBT EE 023                      | Promote technological interventions, automation and enhanced forecasting capabilities to increase grid flexibility and support integration of low-carbon energy sources.                                                   |
| CBT EE 024                      | Support production of heat and cooling from waste heat as directly eligible activities.                                                                                                                                    |
| CBT EE 025                      | Promote creation of intangible assets and R&D / innovation activities in the energy sector that aim to comply with substantial contribution criteria for climate change mitigation.                                        |
| CBT EE 026                      | Promote commercial and residential micro-generation systems from wastewater or waste treatment, such as small-scale energy recovery                                                                                        |
| <b>Environmental Protection</b> |                                                                                                                                                                                                                            |
| CBT EP 001                      | Development and implementation of adaptation strategies at national level or in the context of de-centralisation programmes                                                                                                |

|                   |                                                                                                                                                                                                                                                                                                                |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CBT EP 002</b> | Preparation of national inventories of greenhouse gases (emissions by sources and removals by sinks)                                                                                                                                                                                                           |
| <b>CBT EP 003</b> | Supporting the integration of climate change adaptation into national and international policy, plans and programmes                                                                                                                                                                                           |
| <b>CBT EP 004</b> | Elaboration of climate change-related policy and economic analysis and instruments, including national plans to mitigate climate change                                                                                                                                                                        |
| <b>CBT EP 005</b> | Improving regulations and legislation to provide incentives to adapt                                                                                                                                                                                                                                           |
| <b>CBT EP 006</b> | Climate technology needs' surveys and assessments; institutional capacity building                                                                                                                                                                                                                             |
| <b>CBT EP 007</b> | Dedicated budget support to a national or local authorities for climate change adaptation policy implementation                                                                                                                                                                                                |
| <b>CBT EP 008</b> | Preservation of the CO <sub>2</sub> storage capacity of vegetation cover (especially forests) and soil (especially wetlands)                                                                                                                                                                                   |
| <b>CBT EP 009</b> | Contribution to the preservation of water resources or erosion prevention to adapt to the effects of climate change                                                                                                                                                                                            |
| <b>CBT EP 010</b> | Protection and enhancement of sinks and reservoirs through sustainable management and conservation of oceans and other marine and coastal ecosystems, wetlands, wilderness areas and other ecosystems                                                                                                          |
| <b>CBT EP 011</b> | Climate resilient conservation measures allowing species to adapt to climate change (e.g., protected eco-corridors for migration)                                                                                                                                                                              |
| <b>CBT EP 012</b> | Flood protection measures that reduce the consumption of energy and reduce GHG emissions                                                                                                                                                                                                                       |
| <b>CBT EP 013</b> | Ecosystem based adaptation, i.e. the use of ecosystems or ecosystem services to help people to adapt to climate change (e.g. wetland restoration and management to enhance continuity of drinking water supply in drought prone areas)                                                                         |
| <b>CBT EP 014</b> | Climate-change-mitigation related research and monitoring. Oceanographic and atmospheric research and monitoring                                                                                                                                                                                               |
| <b>CBT EP 015</b> | Flood protection measures in areas which are becoming increasingly flood-sensitive (e.g. closing of estuaries, building of dikes and sea defences, restoration of wetlands) – with due consideration for the potential environmental impacts of such measures                                                  |
| <b>CBT EP 016</b> | Education, training and public awareness related to climate change, the causes and impacts of climate change and the role of adaptation                                                                                                                                                                        |
| <b>CBT EP 017</b> | Restoring the function of floodplains in combination with sound land-use planning of watersheds and wetlands thereby reducing the exposure to floods and improving water availability in areas affected by increasing water scarcity and/or more variable rainfall patterns (including higher amounts of rain) |
| <b>CBT EP 018</b> | Adaptation-related climate research including meteorological and hydrological observation and forecasting, impact and vulnerability assessments, etc.                                                                                                                                                          |
| <b>CBT EP 019</b> | Education, training and public awareness related to climate change, the causes and impacts of climate change and the role of mitigation                                                                                                                                                                        |
|                   | <b>Fisheries</b>                                                                                                                                                                                                                                                                                               |

|                   |                                                                                                                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CBT FH 001</b> | Promoting changes in fishing practices to adapt to changes in stocks and target species. Introducing flexibility in the gear that is used, the species that are fished, the fishing areas to be managed                                                    |
| <b>CBT FH 002</b> | A project that supports the use of more fuel-efficient boats, made with innovative material and hull shape, and equipped with more efficient engines and storage capacity to reduce the consumption of fuel                                                |
| <b>CBT FH 003</b> | Mapping changes in the range of fish species and strengthening the monitoring of fish stocks to determine the impacts of climate change                                                                                                                    |
| <b>CBT FH 004</b> | Activities that aim at reducing overfishing and excess capacity, including adjusting fleet composition, by supporting small-scale fisheries and discouraging industrial fisheries, especially where fish stocks have been fully or partially overexploited |
|                   | <b>Food Security</b>                                                                                                                                                                                                                                       |
| <b>CBT FS 001</b> | A programme addressing food insecurity which also builds capacity to cope with the impacts of climate change on food production                                                                                                                            |
|                   | <b>Forestry</b>                                                                                                                                                                                                                                            |
| <b>CBT FT 001</b> | Sustainable management of forest resources                                                                                                                                                                                                                 |
| <b>CBT FT 002</b> | Restoration of former forest areas utilising natural seed banks and existing plants, in order to reduce vulnerability of forest ecosystems to the impacts of climate change                                                                                |
| <b>CBT FT 003</b> | Promoting sustainable forest management and adopting harvesting techniques that reduce soil erosion and exposure to wildfires, and promote the conservation of biodiversity in order to safeguard forest ecosystems from the impacts of climate change     |
| <b>CBT FT 004</b> | Protection and enhancement of sinks and reservoirs of GHGs through sustainable forest management, afforestation and reforestation, rehabilitation of areas affected by drought and desertification                                                         |
| <b>CBT FT 005</b> | Improving forest fire management                                                                                                                                                                                                                           |
| <b>CBT FT 006</b> | Improvements in forestry management and surveillance                                                                                                                                                                                                       |
| <b>CBT FT 007</b> | Implementing incentives to curb deforestation                                                                                                                                                                                                              |
| <b>CBT FT 008</b> | Afforestation in a river basin can contribute to a more stable hydrologic regime and to reduce floods                                                                                                                                                      |
|                   | <b>Government &amp; Civil Society</b>                                                                                                                                                                                                                      |
| <b>CBT GC 001</b> | Programme to build leadership and entrepreneurship for effective local action in health, agriculture and nutrition in a changing climate and environment                                                                                                   |

| <b>Transport &amp; Storage</b> |                                                                                                                                                                                                   |
| CBT TS 001                     | Inclusion of climate change considerations in transport planning (e.g. climate proofing of road construction to account for climate change impacts and variability)                               |
| CBT TS 002                     | Non-motorised transportation planning to reduce GHG emissions (cycling and walking) from transport                                                                                                |
| CBT TS 003                     | Adopting infrastructure designs to allow water percolation                                                                                                                                        |
| CBT TS 004                     | New infrastructure, capacity building and/or improvements to existing systems (integrated traffic management systems, driver training, etc.) that lead to significant reductions in GHG emissions |
| CBT TS 005                     | Actions to recharge groundwater                                                                                                                                                                   |
| CBT TS 006                     | A transit-oriented development, a mixed-use residential and commercial area designed to maximize access to public transport, can contribute significantly to GHG reduction                        |
| CBT TS 007                     | Improved access to roads all year round for population vulnerable to climate change impact                                                                                                        |
| CBT TS 008                     | Public transport with an objective to reduce GHG emissions (subway, light rail, bus rapid transit, trams, etc.)                                                                                   |
| CBT TS 009                     | A measure to shift from road to rail or water transportation can significantly reduce GHGs                                                                                                        |
| CBT TS 010                     | Optimisation of conventional and conversion to alternative engine technologies: energy efficiency and fuel switching has expected reduction of GHG emissions as some of the main objectives       |
| CBT TS 011                     | Switching to electric mobility, hydrogen power, liquified natural gas, and hybrid engines                                                                                                         |
| CBT TS 012                     | Development and expansion of public transport to minimize vehicular usage                                                                                                                         |
| CBT TS 013                     | Environmental taxes especially in large urban areas of high congestion                                                                                                                            |
| <b>Tourism</b>                 |                                                                                                                                                                                                   |
| CBT TU 001                     | Diversification of tourist attractions to encompass areas less prone to the risks and impacts of climate change                                                                                   |
| CBT TU 002                     | Sustainable tourism development by introducing zero-carbon business solutions, e.g. zero-carbon resorts, touristic products etc.                                                                  |

|                               |                                                                                                                                                                                                                                          |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CBT TU 003</b>             | Contain negative impacts on tourist areas and restore degraded tourist areas                                                                                                                                                             |
| <b>CBT TU 004</b>             | Contributing to conservation of tourist attractions that reduce GHG emissions, e.g. forests, national parks                                                                                                                              |
| <b>CBT TU 005</b>             | Promotion of eco-tourism as part of a strategy to maintain the resilience of natural ecosystems while diversifying rural livelihoods                                                                                                     |
| <b>CBT TU 006</b>             | Support investments under the Protected Area Initiative and similar programmes that increase protected areas, strengthen conservation and promote ecotourism in national parks and high-value natural areas                              |
| <b>CBT TU 007</b>             | Promote passenger transport for tourism that meets the transport-sector criteria (e.g. zero-emission vehicles, multimodal transport, micromobility) to reduce GHG emissions and air pollution from tourist travel                        |
| <b>CBT TU 008</b>             | Promote low-carbon energy solutions for tourism, in line with energy-sector criteria (e.g. renewable generation or systems compliant with the energy emissions threshold)                                                                |
| <b>CBT TU 009</b>             | Support ICT infrastructure for timely extreme weather forecasts for tourists, using mobile and internet channels to reduce climate-related risks in tourist areas                                                                        |
| <b>Waste</b>                  |                                                                                                                                                                                                                                          |
| <b>CBT WA 001</b>             | Raising public awareness on recycling and waste recovery                                                                                                                                                                                 |
| <b>CBT WA 002</b>             | To use and manage urban solid waste in an integrated way                                                                                                                                                                                 |
| <b>CBT WA 003</b>             | Using hybrid vehicles for waste collection                                                                                                                                                                                               |
| <b>CBT WA 004</b>             | Recycle waste electrical and electronic equipment, paper, metal, plastic, among others                                                                                                                                                   |
| <b>CBT WA 005</b>             | Formalising the activity of waste picker                                                                                                                                                                                                 |
| <b>CBT WA 006</b>             | Optimise urban waste management by including in building designs, waste rooms for adequate waste separation and storage                                                                                                                  |
| <b>CBT WA 007</b>             | Producing fuel material from municipal solid waste and co-processing                                                                                                                                                                     |
| <b>CBT WA 008</b>             | Create demand and strengthen the market for recoverable waste                                                                                                                                                                            |
| <b>CBT WA 009</b>             | Promote biowaste composting systems that use segregated organic waste and are well aerated to avoid methane-generating anaerobic zones                                                                                                   |
| <b>CBT WA 010</b>             | Support biowaste anaerobic digestion systems that treat organic waste and produce biogas in line with taxonomy criteria                                                                                                                  |
| <b>CBT WA 011</b>             | Invest in landfill gas capture and use for electricity and heat generation, biomethane injection into the gas grid, fuel for vehicles, or use as a raw material in industry, with control and monitoring of methane emissions and leaks. |
| <b>CBT WA 012</b>             | Support research, development and professional services in the waste sector that create intangible assets and innovation to promote compliance with substantial contribution criteria.                                                   |
| <b>Water &amp; Sanitation</b> |                                                                                                                                                                                                                                          |
| <b>CBT WS 001</b>             | Promoting water conservation in areas subject to increased water stress due to climate change                                                                                                                                            |
| <b>CBT WS 002</b>             | Introduction of energy-efficient pumps in the sewage system of a city                                                                                                                                                                    |

|                   |                                                                                                                                                                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CBT WS 003</b> | Improving the climate resilience of the water supply and increasing storage to ensure access where climate change adaptation is a main objective or part of broader initiatives to supply clean drinking water, which will also increase the resilience of the population to the effects of climate change |
| <b>CBT WS 004</b> | Biogas production and reuse of energy produced by wastewater facilities                                                                                                                                                                                                                                    |
| <b>CBT WS 005</b> | Measures to design and deliver water and sanitation services which reduce vulnerability to floods of affected water and sanitation infrastructure                                                                                                                                                          |
| <b>CBT WS 006</b> | Project to reduce risks of urban flooding of water systems due to climate change and causing contamination through sewage overflow                                                                                                                                                                         |
| <b>CBT WS 008</b> | Treatment of water resources with the introduction of recycled water                                                                                                                                                                                                                                       |
| <b>CBT WS 009</b> | Protect lagoons, which are highly vulnerable to climate change, from salt-water intrusion and contamination                                                                                                                                                                                                |
| <b>CBT WS 010</b> | Wastewater management systems, or systems designed to protect the quality and quantity of existing water resources in the face of climate change, e.g. through the recycling of wastewater                                                                                                                 |
| <b>CBT WS 011</b> | Protection and/or rehabilitation of water bodies, swamps and wetlands as CO2 storage, related studies or research, e.g. limnology                                                                                                                                                                          |
| <b>CBT WS 012</b> | Developing or enhancing systems for monitoring drinking water, in areas affected by higher temperatures, floods and rising sea level as a consequence of climate change                                                                                                                                    |
| <b>CBT WS 013</b> | Capturing and flaring methane in domestic and industrial wastewater treatment plants                                                                                                                                                                                                                       |
| <b>CBT WS 014</b> | Use and exploit alternative water sources (such as groundwater harvesting and groundwater protection, rainwater harvesting for irrigation)                                                                                                                                                                 |
| <b>CBT WS 015</b> | Water basin management involving forest protection / reforestation for the purpose of reducing the severity of floods while increasing carbon uptake                                                                                                                                                       |
| <b>CBT WS 016</b> | Promote and implement water efficiency programmes in the context of climate change                                                                                                                                                                                                                         |
| <b>CBT WS 017</b> | Water basin management involving forest protection / reforestation for the purpose of reducing the severity of floods while increasing carbon uptake                                                                                                                                                       |
| <b>CBT WS 018</b> | Actions to promote efficient use of surface water                                                                                                                                                                                                                                                          |
| <b>CBT WS 019</b> | Water reservoir maintenance and watershed management                                                                                                                                                                                                                                                       |
| <b>CBT WS 020</b> | Flood mitigation and control measures                                                                                                                                                                                                                                                                      |
| <b>CBT WS 021</b> | Measures to minimize losses in water courses; Invest in water distribution and supply systems that meet structural leakage benchmarks (e.g. Infrastructure Leakage Index threshold) and apply technical standards to reduce physical losses.                                                               |
| <b>CBT WS 022</b> | Support desalination plants where energy used meets the taxonomy's emissions threshold (e.g. 100 gCO <sub>2</sub> e/kWh) or consumption per m <sup>3</sup> is within specified limits.                                                                                                                     |
| <b>CBT WS 023</b> | Upgrade existing abstraction and water treatment plants to reduce average energy consumption in line with taxonomy requirements (e.g. ≥20% reduction vs a three-year reference).                                                                                                                           |

## Annexure XII Gender Budget Tagging Guidelines

Gender Budget Tagging (GDT) is a public financial management tool that identifies, classifies, and tracks budgetary allocations and expenditures that contribute to gender equality outcomes. To mainstream gender considerations across all sectors, Gender Budget Tagging has been introduced as part of the integrated budgeting framework. The design of the Gender Budget Tagging framework draws upon the best international practices. The Organisation for Economic Co-operation and Development (OECD) themes on gender budgeting were reviewed and compared with the themes developed under the Sub-National Governance (SNG) programme. Based on this comparative analysis, gender budgeting themes have been adopted from the OECD framework, while corresponding actions and measures have been contextualized to align with Pakistan's national and provincial priorities.

### Instructions

1. Gender budgeting will be a regular feature of the BCC. Departments are required to fill the relevant form specifying gender-wise budget estimates and expenditure during each financial year.
2. Review departmental programs, projects, or budget lines to identify any activity that has a direct or indirect gender impact (e.g., women's education, maternal health, gender-based violence prevention, economic empowerment initiatives, or women's participation in governance).
3. Refer to Table 2: Gender-Related Actions and Measures in the GDT Guidelines Table-2.
4. Identify the **most appropriate GDT code** that aligns with your activity or expenditure.
5. Each GDT code corresponds to a specific gender-responsive action or measure.
6. Enter the **selected GDT code** in the "Gender Budget Tagging Code" column of the relevant budget form.
7. Assign a **quantitative weightage (0–100%)** based on the proportion of the budget item that contributes to gender objectives.

- *Example: If 50% of a project's activities target women's empowerment, record 50% as the weightage.*

8. Provide a brief justification in the remarks or explanatory memo section explaining how the activity contributes to gender outcomes.

9. Include any gender-disaggregated data, where available.

**Table 2: Gender Budget Tagging Actions & Measures List**

| Gender Tagging Codes | Action and Measures                                                                         |
|----------------------|---------------------------------------------------------------------------------------------|
|                      | <b>Education and Skills Development</b>                                                     |
| GDT ES001            | Expand access and retention of girls in schools and colleges, higher education              |
| GDTES002             | Support women's participation in TVET, STEM, and digital literacy.                          |
| GDTES003             | Improve gender-responsive learning environments.                                            |
|                      | <b>Health and Reproductive Care</b>                                                         |
| GDTHC001             | Improve maternal and neonatal services.                                                     |
| GDTHC002             | Expand access to reproductive healthcare and awareness including family planning facilities |
| GDTHC003             | Integrates gender into health policies, staffing, and access.                               |
|                      | <b>Economic Empowerment and Employment</b>                                                  |
| GDTEC001             | Promote women-owned enterprises and startups. Incubations, accelerators                     |
| GDTEC002             | Enhance opportunities for employment and fair workplace practices.                          |
| GDTEC003             | Expand women's access to credit, savings, and digital finance.                              |
|                      | <b>Social Protection and Gender-Based Violence Response</b>                                 |
| GDTSP001             | Provide cash transfers, pensions, or support for vulnerable women. Poverty red              |
| GDTSP002             | Recognize and support unpaid care work.                                                     |
| GDTSP003             | Address GBV through services, justice, and awareness including TFGBV                        |
|                      | <b>Governance, Participation, and Leadership</b>                                            |
| GDTGL001             | Increase women's representation in leadership and decision-making.                          |
| GDTGL002             | Integrate gender into policy, planning, and budgeting.                                      |
| GDTGL003             | Improve gender data, transparency, and accountability.                                      |
|                      | <b>Climate Resilience, Environment, and Infrastructure</b>                                  |
| GDTCR001             | Engage women in climate resilience, resource management, action and sustainability.         |

|          |                                                                    |
|----------|--------------------------------------------------------------------|
| GDTCR002 | Ensure safety and accessibility in urban and rural infrastructure. |
| GDTCR003 | Promote green skills and awareness for women.                      |
